APRIL 24, 2024

chemistry.nd.edu/undergraduate

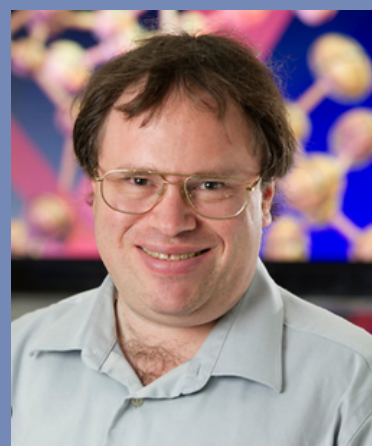

In case you missed it....

The **Chemistry and Biochemistry** club and their guests had a fun evening at the second annual **Chemistry Formal**. The event was held in the Jordan Hall Galleria.

2024 Last Lecture Speaker

Prof. Seth Brown

Wednesday May 1st,
5-6 pm, 138 DeBartolo

Chick-fil-A provided.
Please RSVP [here](#).

You won't want to miss....

One of the most popular events of the year is the **Last Lecture** sponsored by the Chemistry and Biochemistry Club

Congratuatiions.....

This year's **Goldwater Scholars** include two of our own.

Don't be afraid to go after these national awards!

Emma Powers.
(Biochemistry '25).

Reinhard Barstch
(Chemistry '25)

The **Chem and Biochem Club** was awarded a **Community Engagement Grant** from the American Chemical Society for their "Generations" dinner. Nice work!

More details about that event can be found [here](#).

DGL DIGEST: Advising Notes and Reminders

As registration wraps up, please keep in mind that overload requests go through the Academic Dean's Office. The eform to request over 18 credit hours can be found in insideND. eform review may not occur until grades are posted for this semester.

Rising Sophomores: We will be entering your registration for the biochemistry seminar. Most of the details have been resolved. We are just waiting on a few more responses so we do them all at once.

R and S Configurations: Research and Safety

Students staying on campus for the summer to do research, should register for SC48999 (CRN 1369). This is a zero credit, zero tuition course that gives you access to all Notre Dame resources over the summer. Contact Dr. Wietstock (swietsto@nd.edu) for approval. Also, see the summer job opportunity on the next page.

Summer Employment Opportunity: Risk Management and Safety Intern

If you plan to be around this summer, RMS is looking for an intern to assist with organizing chemical inventories across campus. The job also can continue into the Fall 2024 academic year.

More information on the position and how to apply can be found [here](#).

Class of 2024

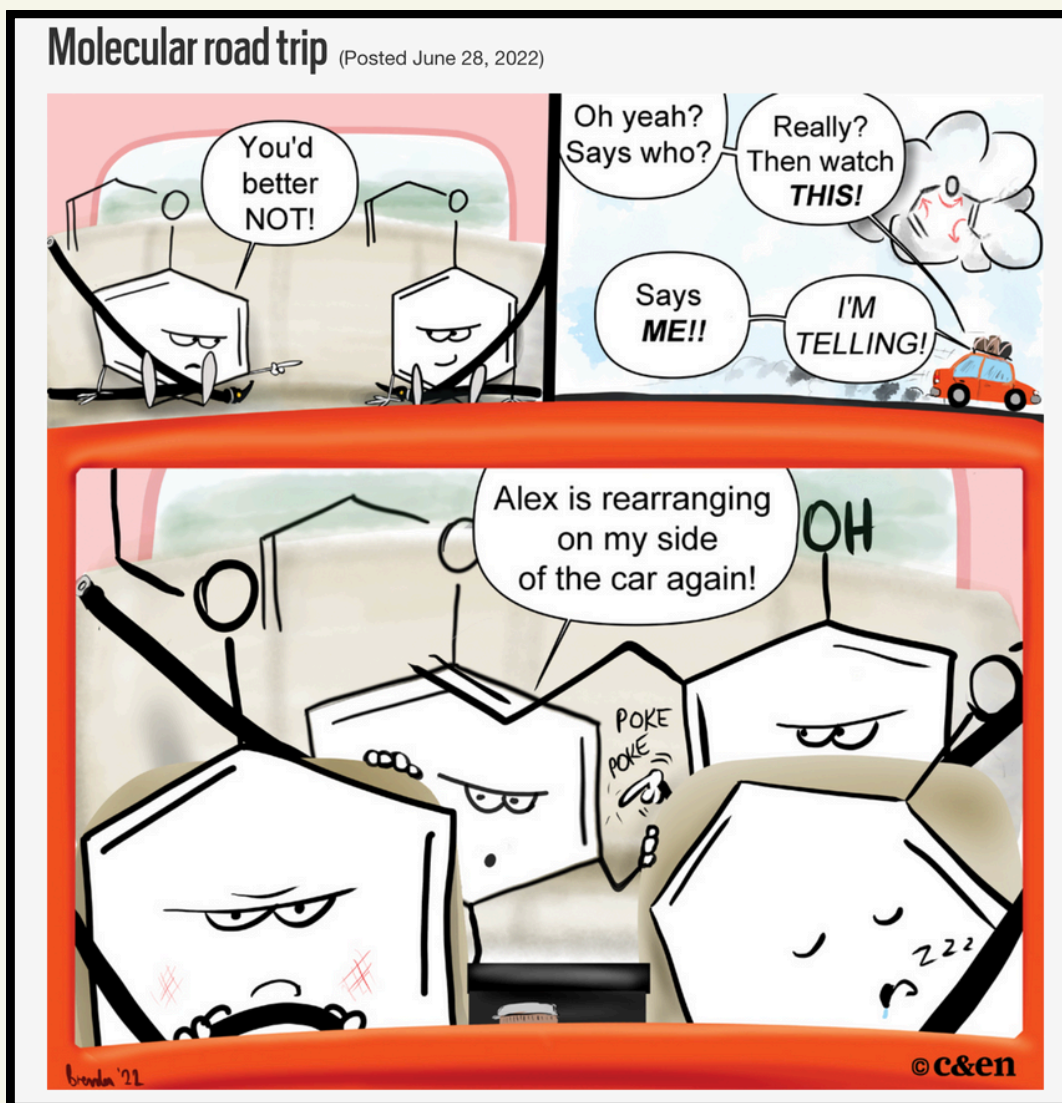

It is less than a month until you are handed that diploma and all this hard work will have paid off. Please make sure you have shared this [link](#) with your family and friends attending commencement weekend activities. Mark your calendars for Saturday, May 18th. The Chemistry and Biochemistry **Diploma Ceremony** is scheduled for 1 pm in the Downes Ballroom in Corbett Family Hall. We will have a dessert reception following the ceremony. These events are less formal, more accessible, much shorter, and more engaging than the university ceremony. Saturday's events are the ideal celebration for older family members (as well as those with young children). Graduates will be asked to arrive by 12:30 pm for a group photo and line up.

A **slide show** that shares your fun and memories from the past four years has become a tradition at our diploma ceremony. Photos can be added to this [folder](#) at any time. **There are no JPW photos to add on to because none were submitted.** I Remember, you will be the one who has to explain to your mom why there weren't any photos of you. So please send us photos!!

Check out our featured sections of this month's newsletter:

- [Up and Atom](#) : Highlighting upcoming events in the department and college.
- [Chem Lab Report](#): Get to know the Arthur J. Schmitt Professor of Chemistry and Biomolecular Engineering, Dr. Paul Bohn.
- [Transition States](#): Meet senior chemistry major, Angela Rea.
- [The Molecular Messenger](#): Interesting stories from the fields of chemistry and biochemistry
- [Alkynes of Fun](#): See what the Chemistry and Biochemistry Club has been up to, and what is planned for the rest of the semester.

Bummed because you are too busy this summer to go on vacation with your family now that you are in college? Just a reminder of what those family car trips were like. (Feel better?)

Good luck with finals and have a great summer.
